-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 12/29/03 (oath).
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-7, 10-13 are rejected under 35 U.S.C. 102(e) as being anticipated by Kasper et al 2003/0174305.

Regarding to claimed invention claims, Kasper et al suggest measuring device for measuring and staking out of building ground plans for new building i.e. preparation of batter board and as well as area calculation for surveying of existing buildings or for examination of individual measurements of a building on col. 4, paragraph [0074]. With regarding claimed step of providing at least two batter points away from boundary of the building, Kasper discloses a marker transmitter that triggers certain positions and sets marking when reaching said positions in order to transfer CAD floor plan. In figure 9b actual position of the mobile robot is calculated using triangulating position of the three signal beam detectors arranged parallel and with the distances d_1 and d_2 in one plane and base distances b_1 and b_2 for the determination of the distance r calculated from α_1 and α_2 and the base distances, see paragraph [0090]. With regard to claimed building element data, Kasper et al discloses measuring device as shown in

Art Unit: 2863

figure 10a, with a two-dimensional positioning with only one signal beam, signal receiver 3d, equipped with three rod sensors located parallel to the rotation axis, see paragraph [0088] and in paragraph [0089] and [0090] discloses the method for calculating distance.

Allowable Subject Matter

2. Claims 8 and 9 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The cited art does not teach claimed invention as specifically recited as first, second, and third building element at required relative angle.
